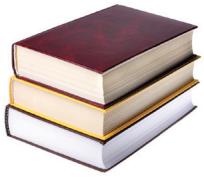
Glassware

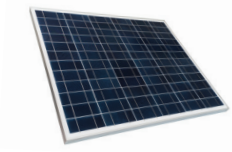
Pallets

Fire Extinguishers & Smoke Detectors



Books & Manuals

Lab Plastics



Solar Panels

Bike Tires & Tubes

Grain Bags

Big #2 Plastics

We're always looking for new materials for our business clients to recycle with us.

Eco-Cycle partners with businesses to help innovate new recycling streams. For example, we have created a successful grain bag recycling program to support our local breweries with their production waste. This project was made possible with the help of Avery Brewing, who took the initiative to ask about a second use for their grain bags. Since then, we have transferred this model to the outdoor industry to tackle the question of polybags for retailers.

We want to hear what materials you have!
Contact us at hauling@ecocycle.org, or call 303.444.6634 ext. 101

Here's some of the information we'll ask for:

- What kind of material is this made of?
- Do you know of any other businesses that have this material?
- What kind of volume are you producing of this item?
- How often are you looking to have it picked up?
- Is it clean and can it be stored?
- Are you willing to pay to have it recycled?
- Who on staff handles this material?
- Can you eliminate the material from your production or upstream? For example, plastic bags can be removed at distribution before they are sent to your store.
